Pipeline for a mobile robot (Self Driving Car)

Concept

- Sketch and present an idea for an electric vehicle
 - Design phase of IFI-Makers Mascot
 - Needs to be buildable before the end of July
 - Buildable means > 60% done
 - Project will be shown at H19 “fadderuke” & presented for DnB Sparebankstiftelsen
- (Optional) **Grab your team & Join other phases**
 - Have fun doing awesome stuff
 - Gain practical experience
 - Get awesome at doing project work

Electric Vehicle?

- Something that is electric and moves in the world
 - Air
 - Land
 - Water
 - Mix
- Add some sensors and you got a Robot

Introducing JUMP

Now, you can find and rent an electric bike using your Uber app. Select Bike, and enjoy the ride.

Move through traffic faster, easily ride up hills, and reach your destination without breaking a sweat.

The Bikes

JUMP bikes are pedal-assist electric bikes, so the harder you pedal the faster you'll go. An integrated GPS and lock means that you can find a bike near you, and go for a ride.

Go further, get there faster, and have more fun.

Top Tips

- Map your team's field of interest and area of expertise/knowledge
 - Pursue what you're passionate about!
- Actuators which moves stuff on the vehicle is generally popular
- Breakthrough innovation usually comes from utilizing many small innovations
- Ideas spark Ideas – Get inspired!

Evaluation

- Timetable
- Realism
- Wow factor
- Creativity
- Enthusiasm
- Concept and Idea
